STANDARD NUMBER: 81.3.4			

53.26 **Policy**

- 53.26.1 WACDC frequencies provide for an uninterrupted flow of information among law enforcement agencies, and among law enforcement and public service organizations, such as fire department and ambulance services. This communications capability is necessary to provide proper coordination and deployment of personnel in times of such emergencies as fires, riots, and natural disasters.

- 53.26.2 WACDC has radio equipment capable of two-way operation on a joint public safety frequency or frequencies. These multi-channel radios provide primary dispatch service, car-to-car communications, queries or other computer checks, and communications with other law enforcement jurisdictions.

- 53.26.3 All WEBER COUNTY SHERIFF'S OFFICE vehicles are equipped with the statewide frequency to assist in communications with other agencies that may not be equipped with any of the above frequencies.
